STATISTICAL ANALYST-PROGRAMMER, QUEEN'S CANCER RESEARCH INSTITUTE

Applications are invited for the part-time position (.6 FTE/3 days per week) of Statistical Analyst-Programmer in the Department of Cancer Care and Epidemiology, a Division within the Cancer Research Institute at Queen's University. We are a multi-disciplinary group that conducts health services research in the field of cancer care. Our work includes the study of prognosis, treatment effectiveness and outcomes, patient decision-making, and health policy.

Responsibilities: The candidate will work collaboratively with senior members of the Unit: to prepare linked data sets from large health databases, including the Ontario Health Cancer Registry; to develop and maintain in-house databases; to carry out statistical analyses on specified projects; to prepare written reports; and to create graphs and tables for publication and presentation.

Qualifications: The candidate must hold or be near completion, of a Master's Degree in Statistics, Biostatistics, Epidemiology, Public Health Sciences, or a related discipline with a strong background in statistics. Experience with SAS is required. Related research experience is an advantage. The individual must be self-motivated and able to work independently, as well as to work as part of a team.

Salary will be in accordance with a Queen's University Grade 8 classification. For more information about the Department of Cancer Care and Epidemiology, please visit our website at https://qcri.queensu.ca/cancer-care-epidemiology. Candidates should submit letters of application, including curriculum vitae and the names of three referees, by August 4, 2022 to:

Ms. Tina Dyer,
Department of Cancer Care and Epidemiology,
Queen's University Cancer Research Institute,
10 Stuart Street, Level 2,
Kingston, Ontario K7L 3N6
dyert@queensu.ca

The University thanks all who express an interest in this position and advises that only those selected for interviews will be contacted.

This advertisement is directed to Canadian citizens and permanent residents. Queen's University has an employment equity program, welcomes diversity in the workplace, and encourages applications from qualified candidates including women, aboriginal peoples, people with disabilities, and racial minorities.
